

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (original): A lounge chair, comprising:

- a seat portion;
- a back portion adjacent to the seat portion and capable of being placed in a vertical orientation;
- a plurality of legs which support the seat and back portions; and
- at least one armrest which is movable between a first position above the seat portion and a second position which is lower in height than the first position, wherein the orientation of the at least one armrest is independent of the orientation of the back portion.

Claim 2 (original): The lounge chair as set forth in claim 1 wherein the seat portion is substantially horizontally oriented.

Claim 3 (canceled).

Claim 4 (currently amended): The lounge chair as set forth in claim 1 wherein the seat portion comprises:

- a seat frame and
- a covering material which at least partially covers the seat frame.

Claim 5 (original): The lounge chair as set forth in claim 1 wherein the seat portion comprises:

- a seat frame and
- a support material disposed within the seat frame.

Claim 6 (original): The lounge chair as set forth in claim 1 wherein the back portion is adjustable between a substantially vertical orientation and a substantially horizontal orientation.

Claim 7 (original): The lounge chair as set forth in claim 1 wherein the back portion comprises:

- a back frame and
- a covering material which at least partially covers the back frame.

Claim 8 (original): The lounge chair as set forth in claim 1 wherein the back portion comprises:

- a frame and
- a support material disposed within the back frame.

Claim 9 (original) The lounge chair as set forth in claim 1 wherein each at least one armrest comprises:

- an upper substantially horizontal member; and
- at least one substantially vertical support member.

Claim 10 (original) The lounge chair as set forth in claim 9 wherein each at least one vertical support member is connected to the seat portion.

Claim 11 (original) The lounge chair as set forth in claim 9 comprising two armrests and further comprising at least one horizontal member which connects the two armrests.

Claim 12 (original). The lounge chair as set forth in claim 1 further comprising at least one stop element which prevents movement of each at least one armrest beyond the first position.

Claim 13 (original): The lounge chair as set forth in claim 1 further comprising at least one stop element which prevents movement of each at least one armrest beyond the second position.

Claim 14 (original): A lounge chair, comprising:

- a seat portion, comprising:

- a seat frame and

- a covering material which at least partially covers the seat frame;

- a back portion adjacent to the seat portion wherein the back portion is capable of being placed in a vertical orientation, the back portion comprising:

- a back frame and

- a covering material which at least partially covers the back frame;

- a plurality of legs which support the seat and back portions; and

- at least one armrest which is movable between a first position above the seat portion and a second position which is lower in height than the first position, wherein the orientation of the at least one armrest is independent of the orientation of the back portion, each at least one armrest comprising:

- an upper substantially horizontal member; and

- at least one substantially vertical support member connected to the seat frame;

- at least one stop element which prevents movement of each at least one armrest beyond the first position; and

- at least one stop element which prevents movement of each at least one armrest beyond the second position.

Claim 15 (original): The lounge chair as set forth in claim 14 comprising two armrests and further comprising at least one horizontal member which connects the two armrests.

Claim 16 (original): The lounge chair as set forth in claim 14 wherein the back portion is adjustable between a substantially vertical orientation and a substantially horizontal orientation.

Claim 17 (original): A lounge chair, comprising:

- a seat portion, comprising:

 - a seat frame and

 - a support material disposed within the seat frame;

- a back portion adjacent to the seat portion wherein the back portion is capable of being placed in a vertical orientation, the back portion comprising:

 - a back frame and

 - a support material disposed within the back frame;

- a plurality of legs which support the seat and back portions; and

- at least one armrest which is movable between a first position above the seat portion and a second position which is lower in height than the first position, wherein the orientation of the at least one armrest is independent of the orientation of the back portion, each at least one armrest comprising:

 - an upper substantially horizontal member; and

 - at least one substantially vertical support member connected to the seat frame;

 - at least one stop element which prevents movement of each at least one armrest beyond the first position; and

 - at least one stop element which prevents movement of each at least one armrest beyond the second position.

Claim 18 (original) The lounge chair as set forth in claim 17 comprising two armrests and further comprising at least one horizontal member which connects the two armrests.

Claim 19 (original) The lounge chair as set forth in claim 17 wherein the back portion is adjustable between a substantially vertical orientation and a substantially horizontal orientation.

Claim 20 (new): A lounge chair as set forth in claim 1,

wherein said seat portion, further comprises;

a seat frame and

a covering material which at least partially covers the seat frame;

wherein said back portion adjacent to the seat portion and capable of being placed in a vertical orientation, further comprises;

a back frame and

a covering material which at least partially covers the back frame; and

wherein at least one stop is positioned on the seat portion and configured so as to support said at least one armrest when resting in the first position and to prevent movement of said at least one armrest beyond the first position.

Claim 21 (new): A lounge chair as set forth in claim 1,

wherein said seat portion, further comprises;

a tubular seat frame and

a covering material of at least one strap which at least partially covers the tubular seat frame;

wherein said back portion adjacent to the seat portion and capable of being placed in a vertical orientation, further comprises;

a tubular back frame and

a covering material of at least one strap which at least partially covers the tubular back frame;

wherein said plurality of legs are extensions of said tubular seat frame; and

wherein at least one stop is positioned on the tubular seat frame and configured so as to support said at least one armrest when resting in the first position and to prevent movement of said at least one armrest beyond the first position.
